

BRAND

WATER SOLUBLE POWDER

GUARANTEED ANALYSIS	
Iron (Fe) .....	6%
Derived from EDDHA	

**CAUTION:** *Keep out of Reach of Children*

**Mixing Procedures:** *IRONWORKS* is a soluble product to be mixed with water using strong agitation. A minimum ratio of 1 lb. of *IRONWORKS* per 2 gallons of water must be maintained. For best results mix only with water.

**Recommendations for Use:** In-furrow application of *IRONWORKS* at a rate of 3-4lb/A has shown to be the most effective and beneficial application type to alleviate iron deficiency symptoms. Various environmental factors will increase or decrease the results of this product. Follow good agronomic practices, soil test, use tissue analysis, and consult with a competent agronomist for best results.

**General Directions for In-Furrow Application:** Mix 3 to 4 lbs of product in water at a minimum ratio of 1 lb product -to- 2 gallons water. Apply in-furrow near seed at planting; suggest water volumes of 6 to 12 gallons per acre. Higher water volumes aid in mixing and dispersion. Agitation is recommended during mixing and application.

**General Directions for Foliar Application:** Prior to or at the onset of deficiency symptoms apply 1-2 lb/A using spray carrier (water) volumes of 10 to 20 gallons per acre (ground application) or 5 gallons per acre (air) for best results. For severe deficiency symptoms it may require repeated applications of 1 - 2lb/A applied 2 or more weeks after the initial application.

**Conditions of Sale:** Seller warrants that this product conforms to the chemical description on the label and is reasonably fit for the purpose described when used in accordance with directions for use. The warranty of this product does not extend to use contrary to the label instruction, abnormal conditions, or conditions not reasonably foreseeable to seller. Buyer assumes the risk of any such use.
